

Warehouse Automation

www.ScanForceSoftware.com

It's Wireless...and Batch!

ScanForce's implementation of wireless communication is the first of its kind for Sage 100 ERP — a wireless solution that also works in batch mode. This hybrid communication functionality brings all of the benefits of wireless communication without the costs and reliability concerns that appear when full coverage is required. No need to worry about connection outages — your workers will be able to continue capturing data.

ScanForce Warehouse Automation is an automated data collection system designed specifically for seamless integration with Sage 100 ERP Solutions. ScanForce is the ideal solution for small-to-medium sized businesses in the distribution, wholesale, manufacturing, or retail trade.

Capture Data at the Point of Activity

Bar code data collection can provide enormous benefits for just about any business. With the ScanForce bar code data collection solution, capturing data is faster and more accurate, costs are lower, mistakes are minimized, and managing inventory is much easier.

ScanForce allows you to collect data remotely on rugged, warehouse tested handheld terminals. These portable handhelds let you roam your warehouse cable-free, allowing you to collect information at the point of activity.

Increasing Productivity

Increase productivity, reduce paperwork, improve accuracy, and eliminate data re-entry with the following ScanForce Warehouse Automation features:

- Optimize the shipping cycle with programs to pick, check, pack, and ship your orders
- Have your Receipt of Goods processed while on the receiving dock as soon as your personnel receives and verifies the shipment
- Perform inventory functions such as Transfers, Issues, and Physical Counts in a fraction of the time
- ...And much more!

Once the inventory task has been performed with the handheld scanner, the data is sent directly into Sage 100 ERP! There is no need for a clerk to re-enter the data. Enjoy the benefits of reduced errors and improved data integrity. Eliminate having your salespersons wait for accurate inventory information to be made available. Improve customer service and increase productivity. Get the most out of your inventory with ScanForce!

Features

- User Friendly Interface
- Fast item lookups with multiple search criteria
- Display bin locations in all programs
- Automatic recognition of lot/serialized items
- Lot/serial number lookups and validation
- Auto-increment feature
- Calculator in all programs
- Review screens show the user what has been scanned and allows for corrections
- Validation of all fields whether you're in or out of wireless coverage
- Ship goods using Shipping Data Entry or Invoice Data Entry
- Ship in two steps with Pick and Pack
- Receive goods right on the dock and optionally print labels on-the-fly
- Perform put-away and location maintenance right on the spot
- Inquiry live quantity and location information
- Perform Physical Count and other inventory transactions in multiple units of measure
- Supports handhelds in remote locations (i.e. different states)
- Compatible with long-range scan engines that scan up to 50 ft away

Benefits

- Eliminates duplicate data entry errors
- End error-prone, handwritten warehouse documents
- Increase transaction processing speed
- Improve customer service and customer satisfaction
- Increase employee productivity
- True inventory visibility when data is scanned at the point of activity
- Eliminate error-prone manual entry of transactions into the accounting system

Additional Modules

- Integration with ACS Multi-Bin for accurate quantity information at the bin level
- ScanForce Labeling allows thermal label printing from Sage 100 ERP and from the handheld on-the-fly or during receiving
- Bill of Materials allows quick and accurate production entries
- RMA Receiving allows you to verify returns quickly and accurately
- Integration with WOScan for manufacturing and shop-floor automation
